

Mr. **Blaž Golob** is Chairman of Ljubljana Forum on Future of Cities. As CEO of GFS Institute and European Blockchain HUB, he develops the global Blockchain network in 19 European and South East Asian cities.

As a digital entrepreneur and former employee of the European Commission's think-tank on future trends JRC/IPTS, he is involved in co-creation of new concepts and business models, supported by new emerging technologies. He advises start-ups, established companies and international events with agenda setting and new concepts design.

As a member of the EU Strategic Policy Forum on Digital Entrepreneurship and consultant in EU project Digital Cities Challenge, he influenced digital transformation of European cities. He delivers speeches in various international events and in Slovenia his home country. Through Urban Forum he connects 11 Slovenian cities to discuss city challenges and to meet with industry solution providers.

He is an author of the Smart City concept composed by five pillars of key city activities. As an active member of the Millennium Project, leading global futures studies think-tank with 56 nodes worldwide, he co-founded Foresight Europe Network FEN at UNESCO site in Paris in 2014.

As a foresight practitioner he is passionately engaged in foresight study on future of Europe and new concept design of the city of the future, as the city of well - being. He organised fifteen Bled Forums on Future of Europe from 1996 on.

He graduated at Ljubljana University and specialized on European Law at Cambridge University.
