Željko Jurić has been working in the Information Technology Department of the City of Rijeka since 1994. First decade he has been designing information systems. Afterwards, up to 2012, he has been running the “Directorate for development of information systems” that was responsible for planning, building, implementing and maintaining information systems of the City of Rijeka. Since 2012, he is the head of the Information Technology Department, responsible for strategic planning and all aspects of managing the overall ICT infrastructure and information systems of the City of Rijeka. Since 2015, he is the chairman of the supervisory board of the company Smart Ri Ltd., founded by the City of Rijeka in order to coordinate cluster of companies working on project: Centre of Competence for Smart Cities – „Smart RI“. Recently his responsibilities includes coordination of Rijeka’s Smart City action plan for period 2019-2020 and Digital Transformation Strategy for the City of Rijeka “Digital Ri-Wave” for period 2019-2022.
