

GŽ CV:

Gašper Žerovnik is a head of the digital transformation department at T-2 and the project manager of its flagship project – T-2 Smart Cities. His extensive 20+ years of experience in the most complex information technology projects in the fields of IoT, smart devices and app development for the largest clients in industries such as telcos and tourism create solid foundations for him to provide you with the insightful information on how a digital transformation of your community helps to improve the lives of its members.
