

Mr. Luka Brulc is a sales manager in Heliot Slovenia d.o.o., part of Heliot Group. He provides knowledge and the right data with IoT solutions for different industries and cities. He always says IoT Data – the currency of today. His mission is for people to understand and see the added value of IoT in the case of each individual company or institution.

This can be related to conditions monitoring for example, water meters and air quality meters or asset tracking in logistic services.

That is why each IoT project is special, making work very exciting. In close cooperation with technical pre-sales team from Munich and IoT Sigfox network optimisation team in Prague, he takes care for client's demand in Slovenia and when necessary also in other countries in the region.
